

PROVIDING BASIC NEEDS IMPROVES FAMILIES

Every five dollars (\$5) we receive is spent on a 5-gallon blue plastic container for one family. A donation of \$250 will provide fifty plastic containers for a family at risk including families with babies and children. The water will be used for drinking, cooking, and growing food.

Access to safe water is a necessity we often take for granted, but the Aeta tribes have struggled continuously since the volcanic eruption. This cost-effective purchase is much cheaper than using small containers and buckets to fetch water.

Communities who receive your gifts will know who you are because your name, association, or company will be displayed on the side of the dispenser.

Please give a gift that truly makes a difference in lifting families out of thirst and hunger. We are an IRS-approved charity, and your donations can be written off on your US tax returns.

Silver Donor: \$250 plus
